About CAD Foundation

Building a Cardiac Disease Free Society by Helping the Underprivileged

CAD team achieved its historical mark of 325 ECG Machines installation in 23 districts of Karnataka. Unbelievable achievements for CAD team in its journey, where it created the ECG awareness program and installation in 23 districts and in 325 primary health care centers and local govt hospital.

Our Impact

We are the change Makers of 2021 with more than 325 installations across 23 districts in Karnataka and uniting 2500+ doctors in Pan India Project. Cardiology at Doorsteps (CAD) has been at the forefront of tele cardiology segment especially in rural India.

We thank all those who made it happen despite challenges posed by the Covid-19 pandemic in the year, which was arguably one of the worst for the healthcare industry.

Vision 2025

With the helping hands of volunteers, people, philanthropists and government organizations we can achieve more — complete network of PHCs, UHCs and CHCs in every corner of India. Now we are operating in 23 districts, 325 rural health centres and PHCs across Karnataka. These numbers can be levelled up… As we have set a foot mark to Plan It, Live It and Achieve It.

Our Mission

- Provide health care by supplying ECG machines & other ancillary machines to primary health centers at remote places
- Cover all four corners of India with instant medical support
- Educate, train, create awareness among people, localities and rural communities
- Aim to benefit more than a crore people across India

Our Activities

What We Do

Our comprehensive approach to rural healthcare through technology, training, and community engagement

ECG Machine Distribution

Distribution of ECG Machines helps people from rural areas get quick access to health care at Primary Health Centres. It helps PHC doctors find the exact reason and early detection of heart diseases.

Learn more →

Training Programs

CAD Team conducts ECG training and First Aid training programs to students in schools & universities, and trains doctors & nurses in remote places. We provide awareness programs to students & the general public.

Learn more →

Medical Camps

ECG Machines help NGOs and social service organizations to conduct ECG checkups and other medical camps in rural & urban areas, reaching underserved communities.

Learn more →

Emergency Medications

Bolus thrombolytic (clot buster for heart attack) is launched by Cardiology at Doorsteps Foundation and distributed to Primary Health Centers in rural areas for emergency cardiac care.

Success Stories

How We Achieved Our Mission

Our journey from losing a young patient to building a network of cardiac care across Karnataka

2014: The Beginning
After losing a young patient to a massive heart attack due to delayed diagnosis, started collecting demographic data about rural healthcare needs.

Research & Data
Collected data about villages/towns, nearest hospitals, PHCs and local difficulties. Maintained a database of doctors in rural areas.

2018: Digital Revolution
Formed a WhatsApp group of vital doctors in Feb 2018 — a turning point; educated them digitally and then conducted a workshop called Anveshana.

Today: 325 ECG Machines
Dedicated 325 ECG machines to health centers in remote areas across 23 districts, serving over a crore beneficiaries.

Our Team

Doctors & Volunteers

Meet the dedicated healthcare professionals and volunteers making a difference in rural cardiac care

Dr. Padmanabha Kamath
Founder & Chief Cardiologist
MBBS | MD (General Medicine) | DM (Cardiology)

Dr. Manish Rai
Assistant Professor
Department of Cardiology, KMC Hospital Mangalore

Dr. Pramesh Aniruddha Gaidhane
Consultant Interventional Cardiologist
MBBS, MD (Medicine), DM Cardiology

Dr. Karthik Rao.N
Diabetes Specialist
MD, DNB (General Medicine), Fellowship in Diabetes

Dr. Kedar Roplekar
Interventional Cardiologist
Roplekar Hospital, Aurangabad
